

PAID - ON - CALL EMPLOYEE APPRAISALS

Fire Department Town of Menasha
Standard Operating Guidelines
Page 1

January, 1994
Section 5

Most everyone likes to know how they are doing in a job, responsibility, relationship or hobby. That feedback can occur in a variety of ways. Usually in a job setting it is through formal evaluations completed yearly or periodically. The Town of Menasha has not formally evaluated Paid-On-Call Fire Fighters or Officers in the past on a regular basis. It is a difficult challenge because supervisors only have periodic interaction with personnel. But the need is still just as important if not more important because of the nature of fire fighting.

For these reasons, in 1994, we will slowly begin to implement documents for self and supervisory performance appraisals.

The main purpose of the documents will be to provide feedback and improve communications between Officers and Fire Fighters. The system should never be used or misconstrued to find fault in individuals or attempt to punish through "bad appraisals". A weak rating in a category does not imply failure, but simply an area to be improved in order to meet an acceptable standard of performance. Continued low ratings after guidance and training are provided may indicate the inability to perform in a recognized role. If the system works properly, it will illustrate strengths and weaknesses of all members of our department and clearly indicate the expectations of management in order to meet the mission of the fire department.

The documents will remain confidential, will be reviewed by the Fire Chief, Town Administrator and placed in the employee's personnel file on a periodic basis. The guideline suggested is to complete an appraisal at least once every three years for fire fighters, every two years for officers and no more frequently than annual for either.

The following pages are the forms used for the appraisals based on position descriptions. The criteria could also be reviewed by personnel to better understand expectations of performance BEFORE appraisals take place.
